SUMMARY

Fourth-year Software Engineering student at Wachemo University with practical experience developing full-stack web applications. Skilled in Java, Spring Boot, JavaScript, React, Node.js, Express, MongoDB, and REST APIs. Experienced in authentication, payment integration, real-time messaging, SaaS platforms, and responsive web development. Passionate about solving real-world problems through technology.

EDUCATION

Bachelor of Science in Software Engineering

Wachemo University

2023 – Present

SKILLS

- JavaScript / React
- Node.js / Express
- MongoDB / MySQL
- REST API Development
- Git / GitHub
- Problem-Solving
- Responsive Web Development
- Java / Spring Boot

LANGUAGE

- Amharic
- English(basic)

PROJECTS

Kambata Travel

Full-Stack MERN Tourism Platform

- Built a tourism platform for discovering destinations and booking tours.
- Developed travel packages, booking features, and responsive interfaces.
- Used React, Node.js, Express, MongoDB, and REST APIs.

Sofra SaaS

Restaurant Management & Food Ordering SaaS

- Developed a multi-tenant restaurant management platform
- Integrated Chapa payments and KYC verification.
- Maintained up-to-date knowledge of product features and benefits to provide accurate information to clients.
- Implemented automated email alerts

Jobify Platform

Full-Stack Freelance Job Portal

- Built a Spring Boot platform connecting clients and freelancers.
- Implemented Google OAuth and secure email verification.
- Integrated Stripe payments.
- Developed real-time messaging functionality.

Portfolio Website

Personal Portfolio — React & Tailwind CSS

- Designed and developed a modern, responsive personal portfolio website.
- Showcases my software projects, technical skills, experience, and contact information.
- Built with React, Tailwind CSS, JavaScript, and modern UI/UX techniques.
- Includes animated interfaces and responsive layouts for desktop and mobile.
